PROFILE SUMMARY

CompTIA Security+ certified professional with hands-on experience as a SOC Analyst Intern at WSO2. Proficient in incident triaging and SIEM optimization using Azure Sentinel and KQL, with background in offensive security by eJPT certification.

EDUCATION

- B.Sc. in Information Technology - Cybersecurity Specialization, SLIIT June 2022 – May 2026
-

CERTIFICATIONS

- CompTIA Security+ (SY0-701)
 - eJPT – Junior Penetration Tester (INE Security)
-

PROJECTS

Invisible CAPTCHA & Behavior Tracking System

- Developed an invisible CAPTCHA system using Python and FastAPI that achieved a 95%+ accuracy rate in distinguishing human behavior from automated bots through real-time telemetry analysis
- Tech Stack: Python, FastAPI, MongoDB, HTML, CSS, JS

SOC and Honeypot Implementation in Azure Sentinel

- Designed and deployed a Security Operations Center with honeypot traps to detect malicious network behavior in real time.
- Tech Stack: Azure Sentinel, Log Analytics, Azure VMs
- Source: <https://github.com/charithherath251/HONEYPOT>

Implementing a Virtual Active Directory Lab Environment

- Created a local AD environment to simulate enterprise-level domain controller operations for learning and incident simulation.
- Tech Stack: Oracle VirtualBox, Windows Server, PowerShell script

TryHackMe WordPress Privilege Escalation Room

- Simulated privilege escalation attacks on a misconfigured WordPress site in a controlled environment.
- Tech Stack: TryHackMe, WordPress, CentOS, LAMP stack, Oracle VM, TryHackMe
- Source: tryhackme.com/jr/privilegeescalationdFAx

Cyber Threat Intelligence (CTI) Platform | Final Year Research Project | Ongoing

- Architecting and developing a threat intelligence platform designed to scrape and aggregate security articles from open-source and dark web environments.
 - Implementing machine learning models to automatically classify and contextualize incoming threat data by industry sector and geographic location.
 - Deploying and configuring an ELK Stack (Elasticsearch, Logstash, Kibana) to visualize detection results, monitor threat feeds, and generate actionable security alerts.
-

EXPERIENCE

Company: WSO2

Sep 2024 – Mar 2025

- **Title:** Intern – Security Operations Center (SOC) Analyst
- Monitored and triaged an average of 30+ daily security incidents using Microsoft Azure Sentinel.
- Reduced alert fatigue by 11% through the refinement of KQL queries and watchlist logic, effectively eliminating over 50 false-positive alerts per week
- Utilized Azure Active Directory to investigate identity-based threats, analyzing user sign-in logs and permissions to contextualize and validate security alerts.
- Conducted daily manual investigations on 20+ phishing domains, utilizing VirusTotal for threat enrichment to validate and mitigate malicious activity.

Company: Softplus

Oct 2022 – Feb 2024

- **Title:** WordPress Developer
 - Designed and maintained 20+ WooCommerce WordPress websites, enhancing SEO, managing hosting services, and improving security configurations.
-

ACHIEVEMENTS

SLIIT Codefest Technopreneur Challenge (Sep 2025)

Selected as a Top 10 Finalist in a nationwide entrepreneurial competition hosted by SLIIT

Capture The Flag Mentorship and Challenge 4.0 (Sep 2024)

Achieved 2nd Place in a CTF challenge conducted by SLIIT ISACA

Codefest CTF Challenge (Sep 2023)

Qualified as a Finalist for the SLIIT Codefest CTF

Manthara CTF Challenge (Jan 2023)

Secured 4th Place in the inter-university security competition hosted by NSBM.

SKILLS AND TECHNOLOGIES

Security Operations: Azure Sentinel, Azure AD, Log Analytics, SOC Triaging, SIEM Tuning

Penetration Testing: Metasploit, Wireshark, eJPT, WordPress Security

Cloud & Infrastructure: Azure VMs, VirtualBox, Linux, Windows Server

Programming/Data: Python, KQL, SQL, PHP, HTML/CSS, JS

Methodologies & Soft Skills: Incident Triage, IOC Correlation, Case Management, Technical Documentation
